

Add Images

Click on "Choose files" and select the evidence you wish to include with the inspection.

A preview of the selected images is shown.

Click 'Next' once you added all the images.

TIP: it is recommended to take pictures in the normal way before starting the App. Then retire to a safe location where you have good mobile data signal.

The screenshot shows the 'Inspections' app interface. At the top, there is a dark header with the 'Inspections' logo and a menu icon. Below the header, the text 'New Inspection' is displayed. The main heading is 'Step 2: Add Images', followed by the instruction 'Picture evidence is required for non-Zero assessments and always recommended'. A file selection bar contains a 'Choose files' button and the text 'No file chosen'. Below this bar, a note says 'Click 'Choose files', to use Camera'. A section titled 'Images to be Included' has a yellow badge with the number '1'. Below this, a preview image shows a close-up of a metal grate with several circular holes. At the bottom, there are two buttons: 'Back' and 'Next'.

Revision #1
