

Inspection Dashboard

Autumn Inspections When the App opens you will be given a list of Locations that are due to be inspected. Any overdue locations are highlighted Red. Simply tap on the Location that you are going to Inspect. If the location you want is not shown there's two possibilities; 1. The Location may have been inspected recently, so another Inspection is not yet due. Scroll down and tap on the "Unplanned Inspection" button. 2. You might be in the wrong team. The selected team is shown at the top; Argyle in this case. Use the hamburger menu (top-right) to select the Profile view to change your team. TIP: you can return to the view at any time by tapping on the Network Rail icon at the top-left.	 Inspections Dashboard - Argyle Autumn Inspections Dalmuir (Station) YKR - Down Main Due: Today Yoker (Station) YKR - Up Main Due: Today Scotstounhill (Station) YKR - Up Main Due: Today Unplanned Inspection
Manually Select Location Having clicked "Unplanned Inspection" you can select from the full set of Locations managed by your Team. NOTE: "Singer" is not shown above because there was an inspection today already. NOTE: you can submit as many inspections as you need. If you were not happy with an inspection for any reason, just put it in again.
