

# Signed API V2

For external use we offer an API that requires each request to be sent with a "signature" created using the request content and a timestamp. This makes each signature useful for a short time only and prevents possible replay attacks.

## Signed API V2

Base URL: <https://nrsdb.uk/api/nrsdb/v2>

## Signature

Send the following HTTP Headers

X-NRSDB-Signature

X-NRSDB-Timestamp

X-NRSDB-Key

## Endpoints

### ESRs

<https://nrsdb.uk/api/nrsdb/v2/esrs?age=3>
